Professional Summary

Lead Ab Initio ETL Developer with extensive experience in Graph Development, batch processing, ETL pipeline development, and enterprise-scale data integration. Strong knowledge in Ab Initio components including reformat, sort, join, partition, and gather. Experienced in Control Center deployment, EME version control (check-in/check-out & dependency analysis), parsing automation, and sandbox validation. Additional exposure to continuous flow processing, settlement systems, API integration, and automation initiatives.

Core Skills

- Ab Initio Graph Development (Batch & Continuous Flow)
- Reformat, Sort, Join, Partition, Gather
- Control Center Deployment & Monitoring
- EME Version Control & Dependency Analysis
- ETL Pipeline Development & Optimization
- Graph Parser & Mapping Automation
- Sandbox Validation & CI Analysis
- Python Automation & Parsing Tools
- API Integration & Settlement Systems
- Data Mapping & Transformation

Professional Experience

XL Axiata Tbk

Lead ETL Developer | Feb 2019 – Present

- Led development of enterprise-scale Ab Initio ETL solutions and settlement platforms.
- Developed and maintained complex Ab Initio graphs for billing, settlement, reporting, and reconciliation.
- Worked extensively with graph components such as reformat, join, sort, partition, and gather.
- Supported Control Center deployment, scheduling, and operational validation.
- Performed EME code management including check-in/check-out and dependency analysis.

- Built Python-based automation pipeline for parsing .mp, .plan, .pset, .xfr, and .dml artifacts.
- Executed validation and mapping across ~200 sandbox environments.
- Developed graph/sub-graph relationship mapping and parameter extraction framework.
- Supported automation and zero-manual-process initiatives across business domains.

Previous Roles

Worked as ETL Developer and Senior ETL Developer supporting billing migration, retailer productivity, revenue reporting, and B2B settlement initiatives using Ab Initio.

Education

Bachelor Degree in Electrical Engineering – Telkom University (2011 – 2016)

Additional Information

Experience with CI validation, graph mapping analysis, COS integration, and enterprise data processing workflows.
